Hazardous Weather

Hazardous Weather

Hot and Sunny

Low chance for an isolated thunderstorm in the far southwestern South Plains

Weather Forecast Office
Lubbock, TX
Issued Jul 30, 2021 3:04 AM CDT

Hot temperatures in line with normal for this part of the summer are expected on Friday. An isolated thunderstorm or two will be possible across the far southwestern South Plains late this afternoon.

Friday

Slight chance for afternoon showers and thunderstorms

Weather Forecast Office
El Paso, TX
Issued Jul 29, 2021 7:10 PM MDT

Expect a slight chance for scattered showers and thunderstorms across the Gila Region and parts of the Sacramento Mountains first before a very slight chance for isolated thunderstorms across the lowlands later in the afternoon. Much of the moisture will be confined to areas west of the Continental Divide, thus, expect most of the active weather to be near the Arizona and New Mexico border. The winds will be generally southeasterly between 5 and 15 mph. Some areas of stronger winds are possible where thunderstorms are present. The highs will be slightly below the normal for most areas for this time of the year.

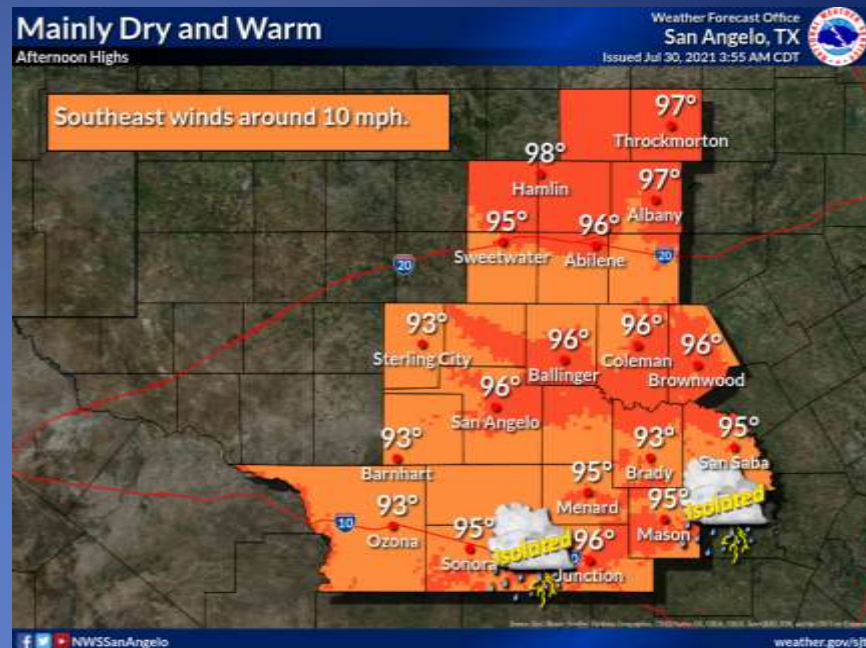

Hazardous Weather

Today's Highs

High temperatures remain below normal today with isolated storms possible this afternoon and evening.

Mainly Dry and Warm

Isolated thunderstorms possible over far southeast counties this afternoon.

Hazardous Weather

Heat Advisory Continues Today

Isolated thunderstorms in Central Texas this afternoon

Weather Forecast Office
Fort Worth, TX

Issued Jul 30, 2021 2:10 AM CDT

Afternoon heat index values will be in the 105 to 108 range in parts of North and East Texas where a Heat Advisory is in effect. Actual high temperatures (shown) will be in the mid 90s to around 100.

Isolated thunderstorms are possible in Central Texas mainly during the afternoon hours.

NWS Fort Worth

weather.gov/fortworth

A Heat Advisory is in effect for noon to 7PM this afternoon. Heat index values in the advisory area will range from 105 degrees up to 108 degrees. Isolated thunderstorms are possible in Central Texas mainly during the afternoon hours.

Multiple Heat Headlines into the Weekend

Both hazards in effect through 7:00pm Saturday

Weather Forecast Office
Shreveport, LA

Issued Jul 30, 2021 3:23 AM CDT

NWS Shreveport

weather.gov/shv

We are slowly crossing over the criteria for an Excessive Heat Warning, with one going into effect later this afternoon. The Heat Advisory will remain in effect area-wide elsewhere.

Hazardous Weather

Isolated showers and thunderstorms are possible again this afternoon, mainly east of a line from Kerrville to Pleasanton. High temperatures will be in the mid to upper 90s over most areas and around 100 along the Rio Grande. Eastern counties may see heat index values reach 105 to 108 at times.

Combination of heat and humidity will result in afternoon heat index values as high as 110 to 115 degrees in portions of central Louisiana, and as high as 110 degrees elsewhere. Heat illnesses may occur if heat related precautions aren't taken. Stay hydrated, take frequent breaks if possible, and find some means to cool off especially if spending much time outdoors.

Hazardous Weather

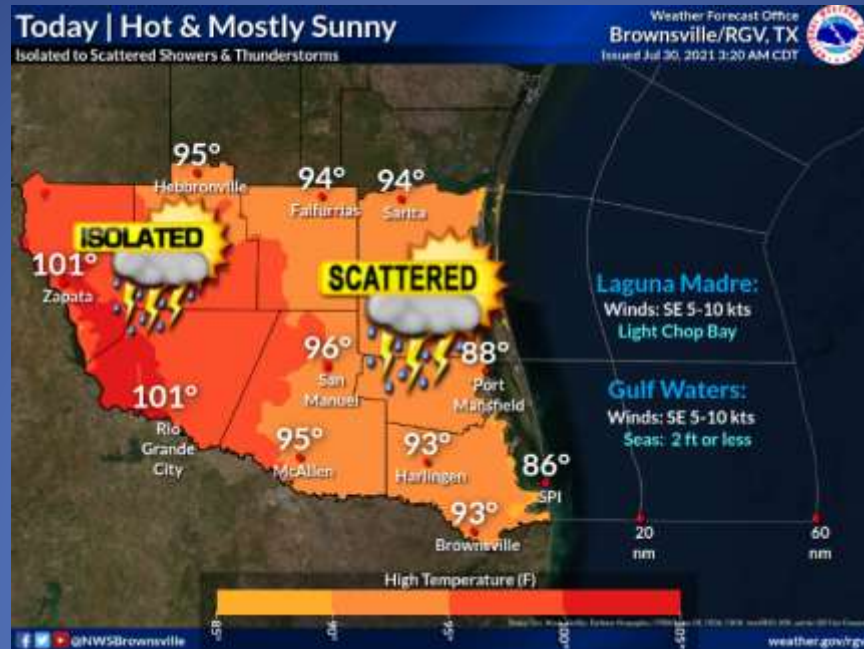

An upper level ridge of high pressure over the central plains will continue to extend into our area. Widely scattered afternoon thunderstorms remain possible as afternoon heating kicks in. Highs will be in the low 90s near the coast and upper 90s with heat indices 105 to 115. Winds will be from the south through west at 5 mph.

Expect another hot day with highs ranging from 90 to 100 under partly to mostly cloudy skies. Heat indices of 105 to 109 are possible. Stay cool and hydrated! Isolated to scattered showers and thunderstorms will be possible today along the sea breeze.

Hazardous Weather

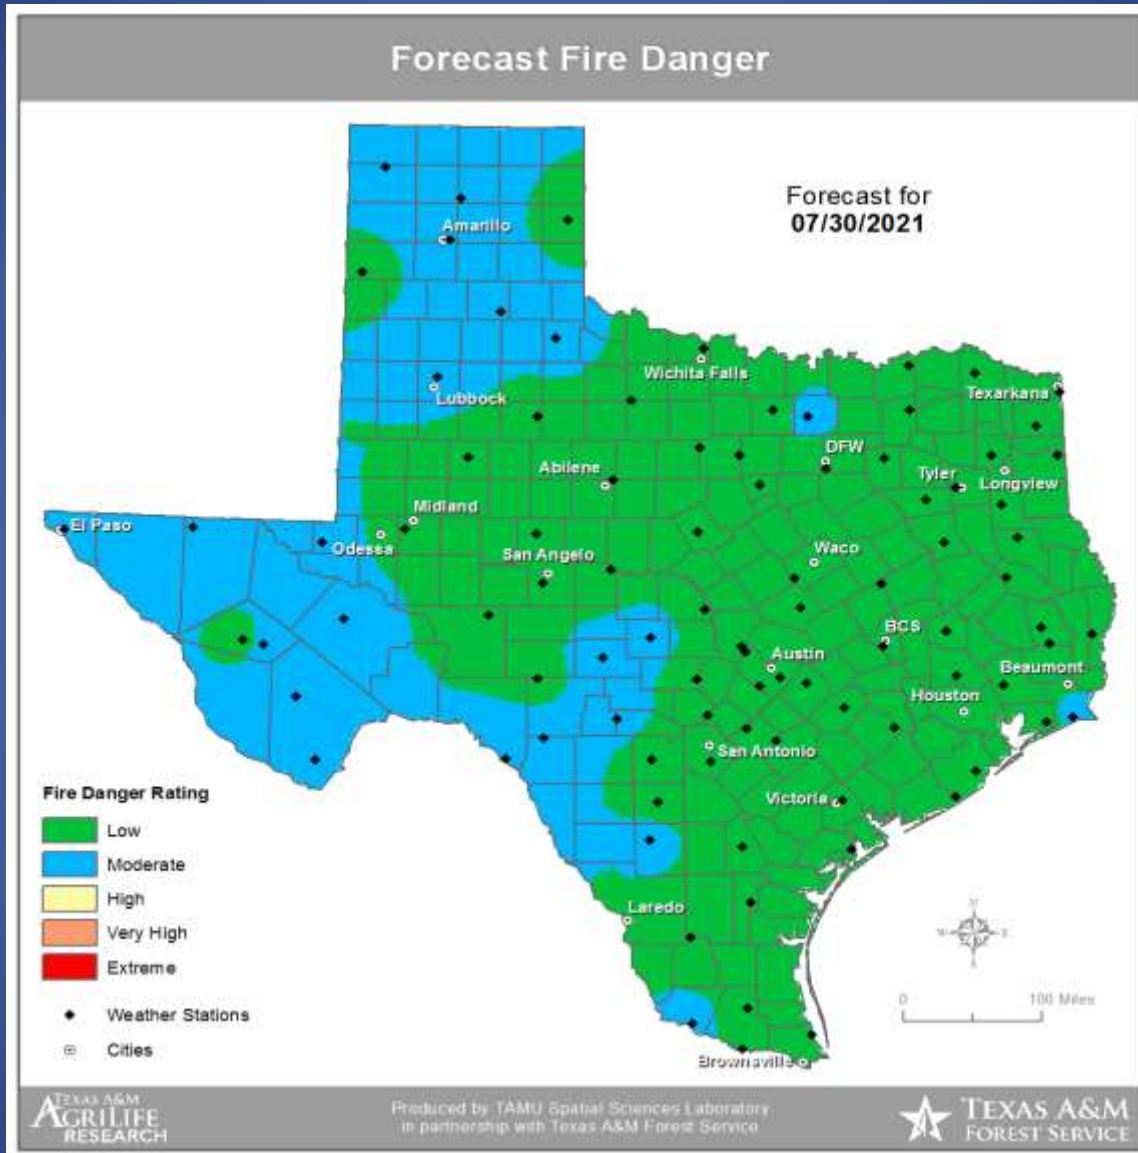

Hot and mostly sunny today with isolated to scattered showers and thunderstorms. Favorable marine conditions will continue today with seas generally 2 feet or less with a light chop on the bay.

Weather Warnings/Advisories Issued

DATE	WARNING TYPE	LOCATION
07/29/21	Flood Advisory	Williamson County
07/29/21	Severe Thunderstorm Warning	Leon and Robertson Counties
